PHILIPS TECHNICAL REVIEW

The Review is published by the Research Laboratories of N.V. Philips' Gloeilampenfabrieken, Eindhoven, Netherlands, and is devoted to the investigations, processes and products of the laboratories and plants which form part of or co-operate with enterprises of the Philips group of companies. In the articles the associated technical problems are treated along with their physical or chemical background. The Review covers a wide range of subjects, each article being intended not only for the specialist in the subject but also for the non-specialist reader with a general technical or scientific training.

The Review appears in four editions: English, Dutch, French and German, all identical in contents. There are twelve numbers per volume, each of about 32 pages. A yearly index is given for each volume and an index covering ten volumes appears every five years (the last was included in volume 25, 1963/64).

Editors: Ir. S. Gradstein, Editor-in-chief
Ir. D. van Dalen
Dr. E. Fischmann
Ir. J. M. van Hofweegen
Drs. J. W. Miltenburg
Dr. J. Ubbink

English edition: D. A. E. Roberts, B.Sc., A.Inst.P., (London)

French edition: H. Piraux (Paris)

German edition: Dipl.-Phys. R. M. K. Dockhorn (Hamburg)

Beam-plasma amplifier tubes	275
Bromine and chlorine in incandescent lamps	173
Cathodes, osmium dispenser	69
COBRA for numerical control of machine tools	285
Colour TV, phosphors for	22
Colour TV transmission systems	34
Detectors, semiconductor	323
Dimming fluorescent lamps with thyristors	265
Display of three-dimensional energy spectra	132
Eddy-current coupling as variable-speed drive	15
Electron-photomicrographs, stereo	231
Energy spectra, three-dimensional	132
Enzyme, substrate and product	160
Evaporated circuits	182
Exposure control system for X-ray diagnostics	92
Field-effect transistor	200
Fluorescent lamps, dimming with thyristors	265
Furnaces, continuous, for rod materials	337
Hearing aids	258
Impact-mounting of components	28
Incandescent lamps containing halogens	173
Inductor, variable, for r.f. heating control	134
Integrated circuits, tunable	264
Integrated circuits:	
general considerations	180
evaporated circuits	182
solid circuits	192
thin-film transistor	200
Interferometric determination of diameter of stars (Narrabri)	141
Kick sorter, display with	132
Laser beam, measurement of wires with	208
Masers for radio astronomy	313
Mass spectrometer analysis of solid surface	344
Microfractography of thin films	87
Mounting, impact-, of components	28
Numerical control with COBRA	285
Osmium dispenser cathodes	69
Peltier cooling	113
Phase theory, III: Ternary systems	213
Phosphors for colour TV	22
Photoconductivity, II: Recombination process, sensitivity, speed of response	47
Photosynthesis	241
Plasma, electron beam in	275
"Plumbicon", compared with other TV camera tubes	1
Printed circuits, impact-mounting of components on	28
Radio astronomy, masers for	313
Reflex klystron for 8 mm, of simple design	310
R.f. heating control with variable inductor	134
Semiconductor detectors for ionizing radiation	323
Solid circuits	192
Solid surface, analysis in mass spectrometer	344
Spiral groove bearing, grease-lubricated, for a straight-through shaft	107
Stellar interferometer at Narrabri	141
Stereophonic radio broadcasting, II: Susceptibility to interference	62
Stereophotography with electron microscope	231
Thin-film circuits	182
Thin-films, microfractography of	87
Thin-film transistor	200
Torque meter	342
Traffic-light sequences	298
Tunnel entrances, lighting	76
TV camera tubes: "Plumbicon" compared with vidicon and image orthicon	1
X-ray diagnostics with exposure control system	92
X-ray pictures in colour	228
X-ray spectrometer, automatic	300
